

# R,D&I ATTRACTION TO BRAZIL

# WHY BRAZIL

## ECONOMY

13th largest economy of the world (GDP of \$1.6 trillion by 2020).

## POPULATION

Total population of 213.2 million and Economically active population (EAP) of 107.8 million.

## GDP

Diversified, integrated and flexible industry, representing 19% of Total GDP (2019).

## PRODUCTION

Fourth largest producer of grains (rice, barley, soybeans, corn and wheat) in the world, behind only China, the United States and India (In 2020, we produced 239 million tons and exported 123 million tons of grain).

## CAPACITY

26 OEMs and production capacity of 4.5 million vehicles

## AGRIBUSINESS

Strong, modern, expanding agribusiness, subject to preservation and sustainability landmarks.

## POTENTIAL

Potential to become the fifth largest consumer market in the world by 2030, surpassing France, the United Kingdom and Germany (Ernest Young and FGV).

## E-COMMERCE

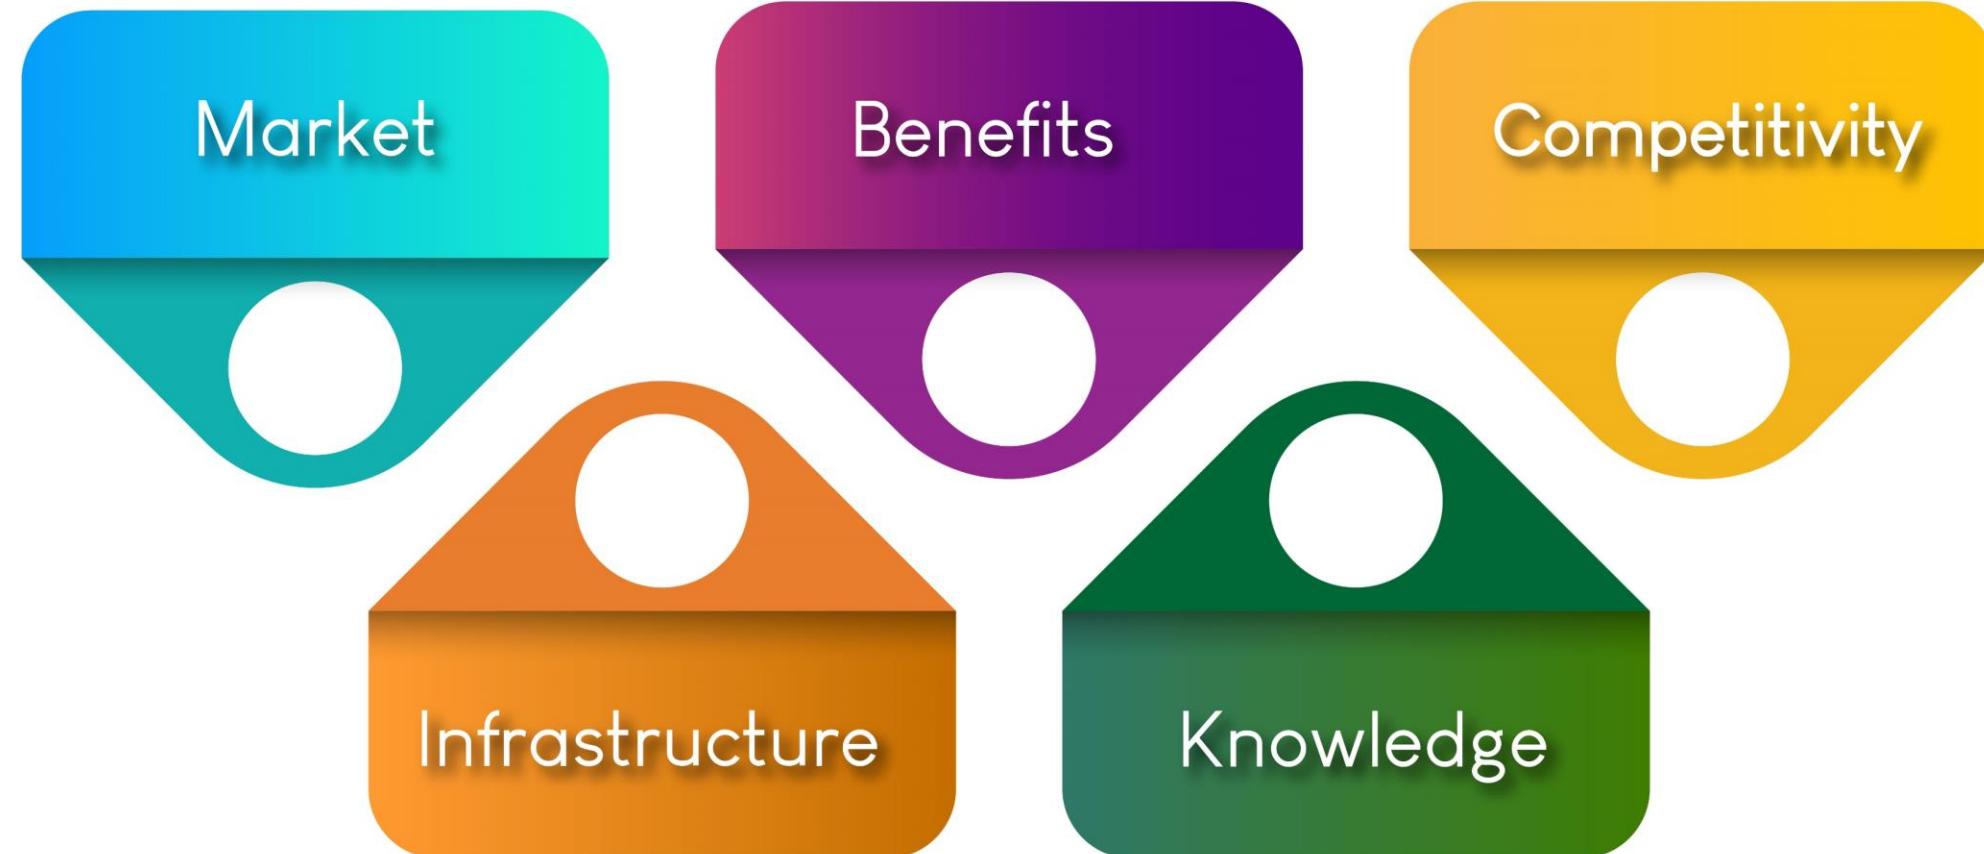

Seventh largest e-commerce market, surpassing the UK, Thailand and Spain (eMarketer, 2021).

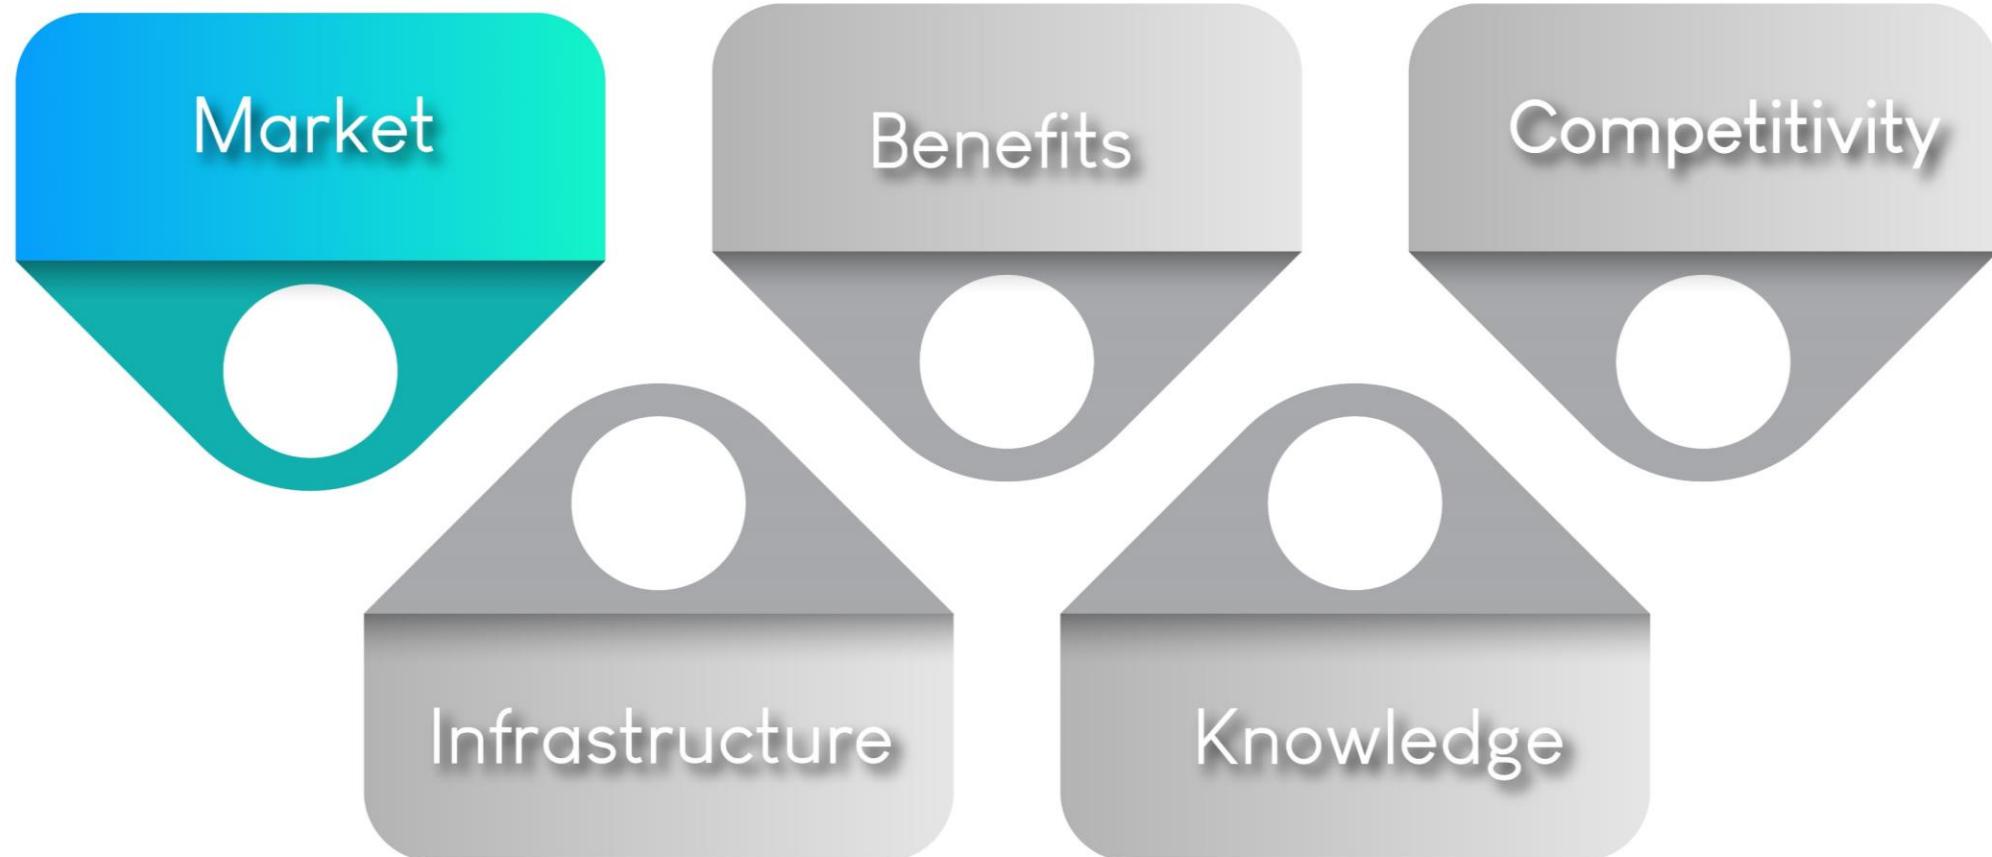

## VEHICLES

Eighth circulating fleet (OICA) and third largest used vehicle market in the world, behind only the United States and China (Kavak, 2021).

MARKET

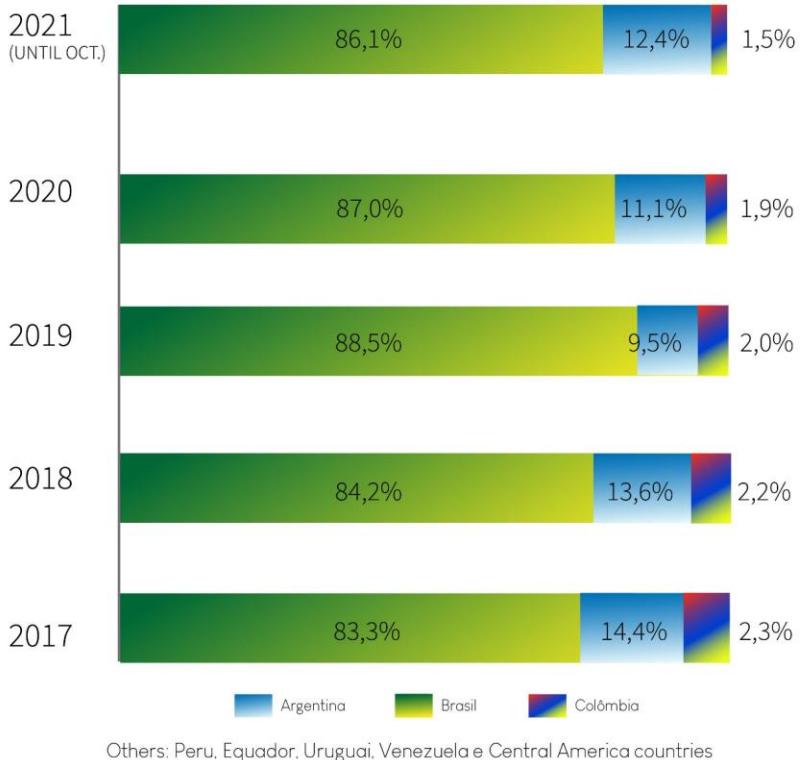

## LATAM VEHICLES PRODUCTION

(In a thousand units)

## LATAM VEHICLES PRODUCTION

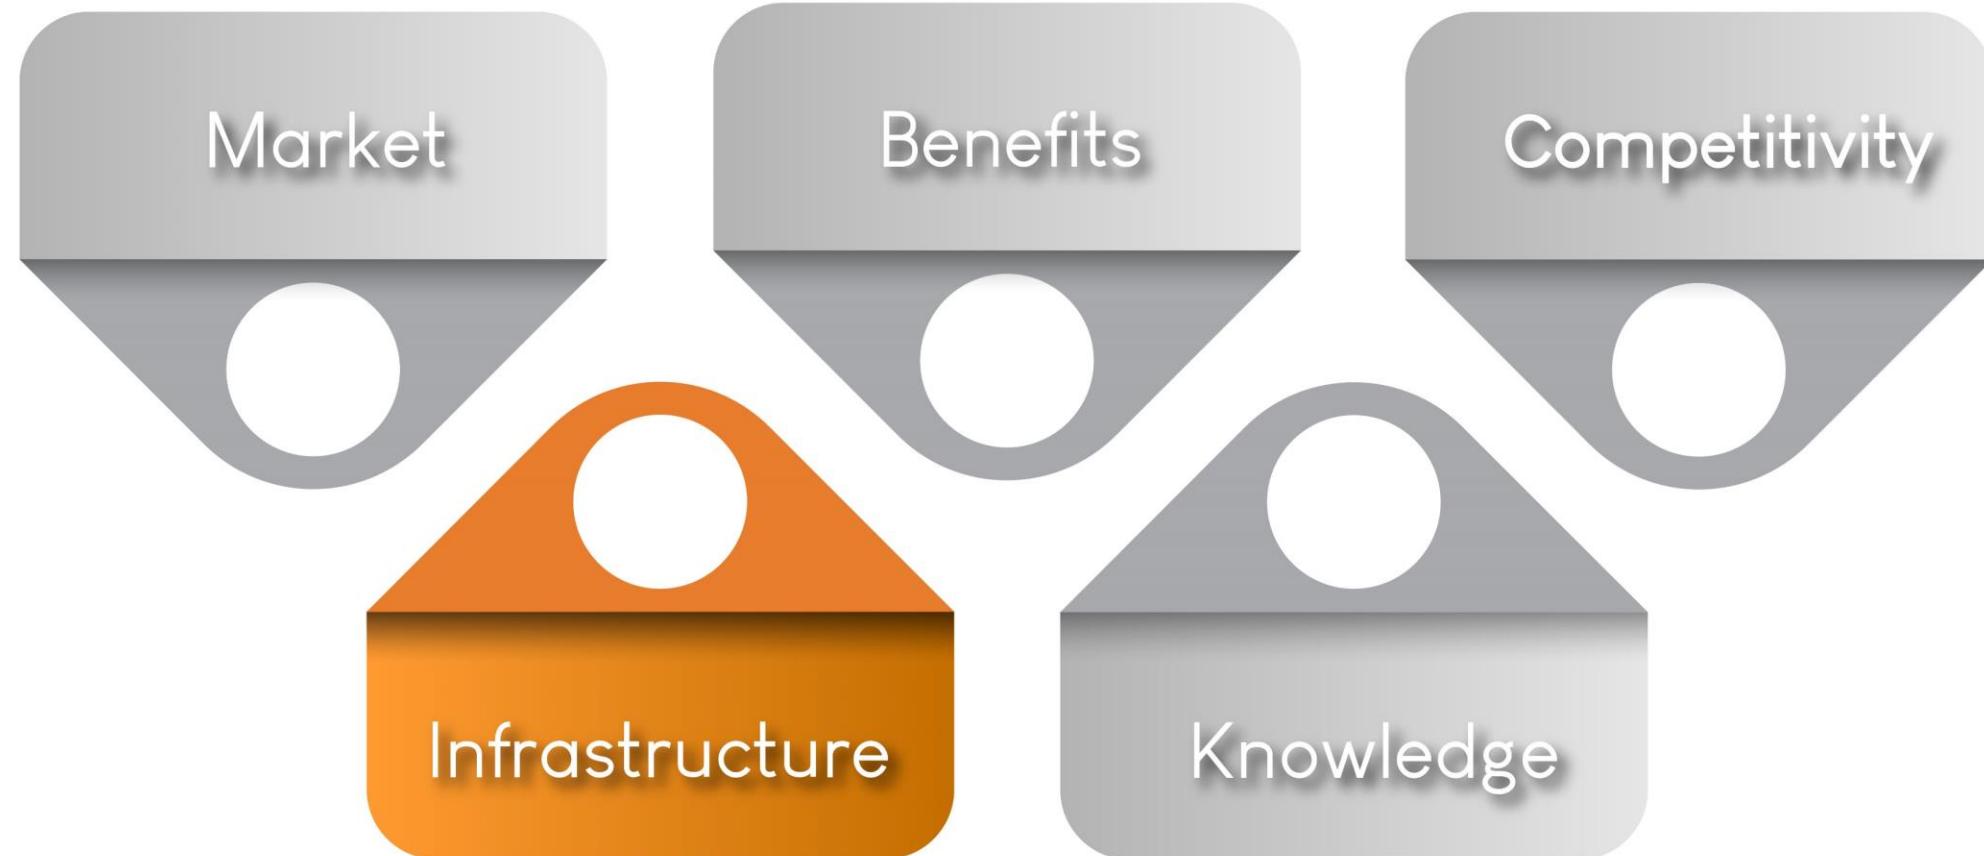

(In % of total)

Despite oscillations in the number of vehicle production, the percentage of national production stands out when compared to other South American countries.

**MARKET**

# WHY TO INVEST IN RD&I IN BRAZIL'S AUTOMOTIVE VALUE CHAIN

# Research, Development and Innovation

**Universities**

**Technological  
Parks**

## INFRASTRUCTURE

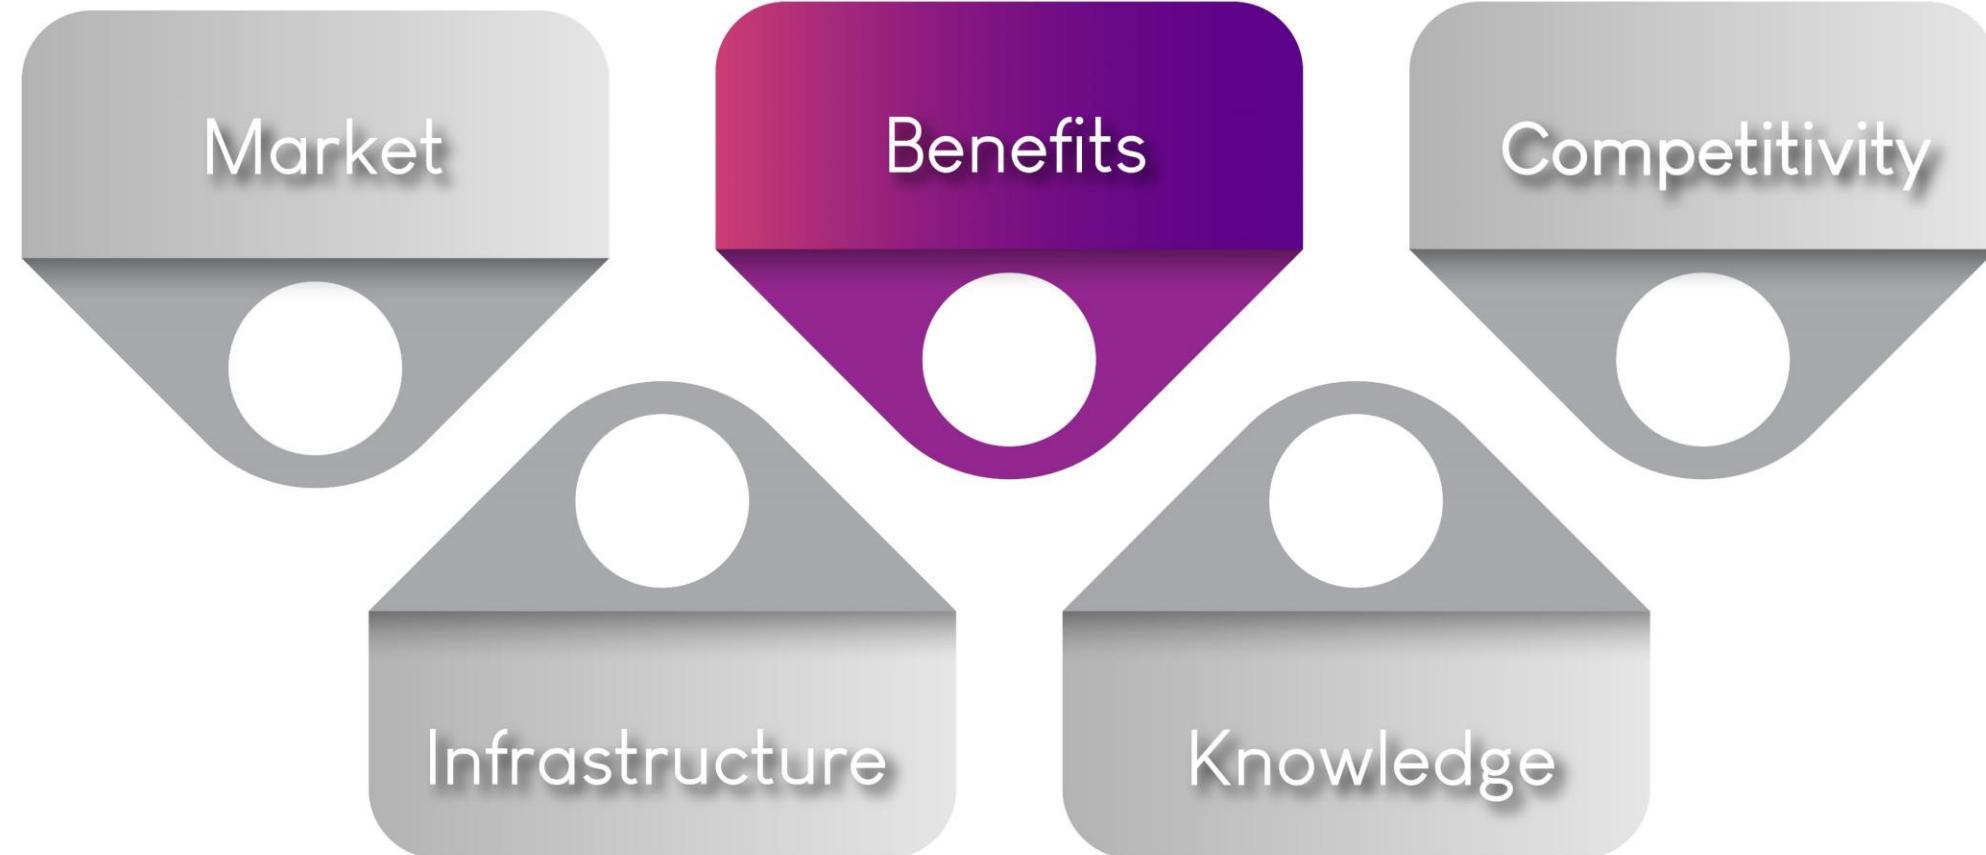

**55 Technological Parks:** environment where several companies from different segments are installed, having technology and innovation as the focal point of their business.

**305 Institutes of Science and Technology:** its main objective is to carry out and encourage scientific and technological research, developing solutions that respond to the needs of companies and society in an innovative way.

## INFRASTRUCTURE

# WHY TO INVEST IN RD&I IN BRAZIL'S AUTOMOTIVE VALUE CHAIN

# LEGAL FRAMEWORKS FOR RD&I IN BRAZIL

## ROTA 2030

Program that aims to stimulate investments in the Brazilian automotive sector, with benefits that allow a reduction of up to 15.3% of the amount spent on R&D in the IRPJ and CSLL, among others

## LEI DO BEM

Granting of tax incentives to companies that carry out research, development and technological innovation, with deduction of up to 34% of the IRPJ or CSLL

## INNOVATION LAW

First law to regulate public-private partnerships. It intends to create favorable environments to public-private partnerships in the development of solutions, encourage the outflow of academic knowledge to the corporate world and modernize the internal environments of companies.

## LEGAL FRAMEWORK FOR STARTUPS

It intends to bring a new regulatory and development environment to small technology companies, facilitating business and investment

## COMPUTER LAW

It grants tax incentives to companies in the technology sector (hardware and automation areas), that invest in Research and Development. The benefits are granted through financial credit that can vary from 1.39% to 13.65% depending on the geographic region

## PADIS

Set of federal tax incentives instituted with the objective of contributing to the attraction and expansion of investments in the areas of semiconductors and displays. Reductions reach 0% in Import taxes, IPI, Pis-Import and Cofins-Import rates for specific machines / equipment / raw materials/ software intended for the production of goods covered by the legislation

IRPJ – Legal Person Income tax | CSLL – Contribution (over) Net Profit | IPI – Industrialized Products Tax

PIS – Social Contribution Program | Cofins – Contribution for Social Security Financing

# THE NATIONAL FUND FOR SCIENTIFIC AND TECHNOLOGICAL DEVELOPMENT - FNDCT

R\$ 9 BI  
in 2022

Accounting and financial type fund whose objective is to finance innovation and scientific and technological development, in order to promote the economic and social development of the country

## PRACTICAL EXAMPLE

EMBRAPII + LEI DO BEM + ROTA 2030

**10.0**

Total amount in millions

- 7.0

→ EMBRAPII (50%) + ICT (20%)

= 3.0

- 0.43  
- 0.82

Tax incentive  
R\$ 1.28 million  
- Rota 2030

15.3% of R&D expenditures  
- Lei do Bem  
27.2% of R&D expenditures

**1.72**

The company pays 17.2%  
of the total project  
amount

# PROJECT - ROTA 2030

Electric Vehicle Recharging

Unit: Certi

Company: WEG Equipamentos Elétricos S.A.

EMBRAP II Project

Development of a national line of equipment  
for recharging electric vehicles, the first of this  
nature in Brazil

# PROJECT - ROTA 2030

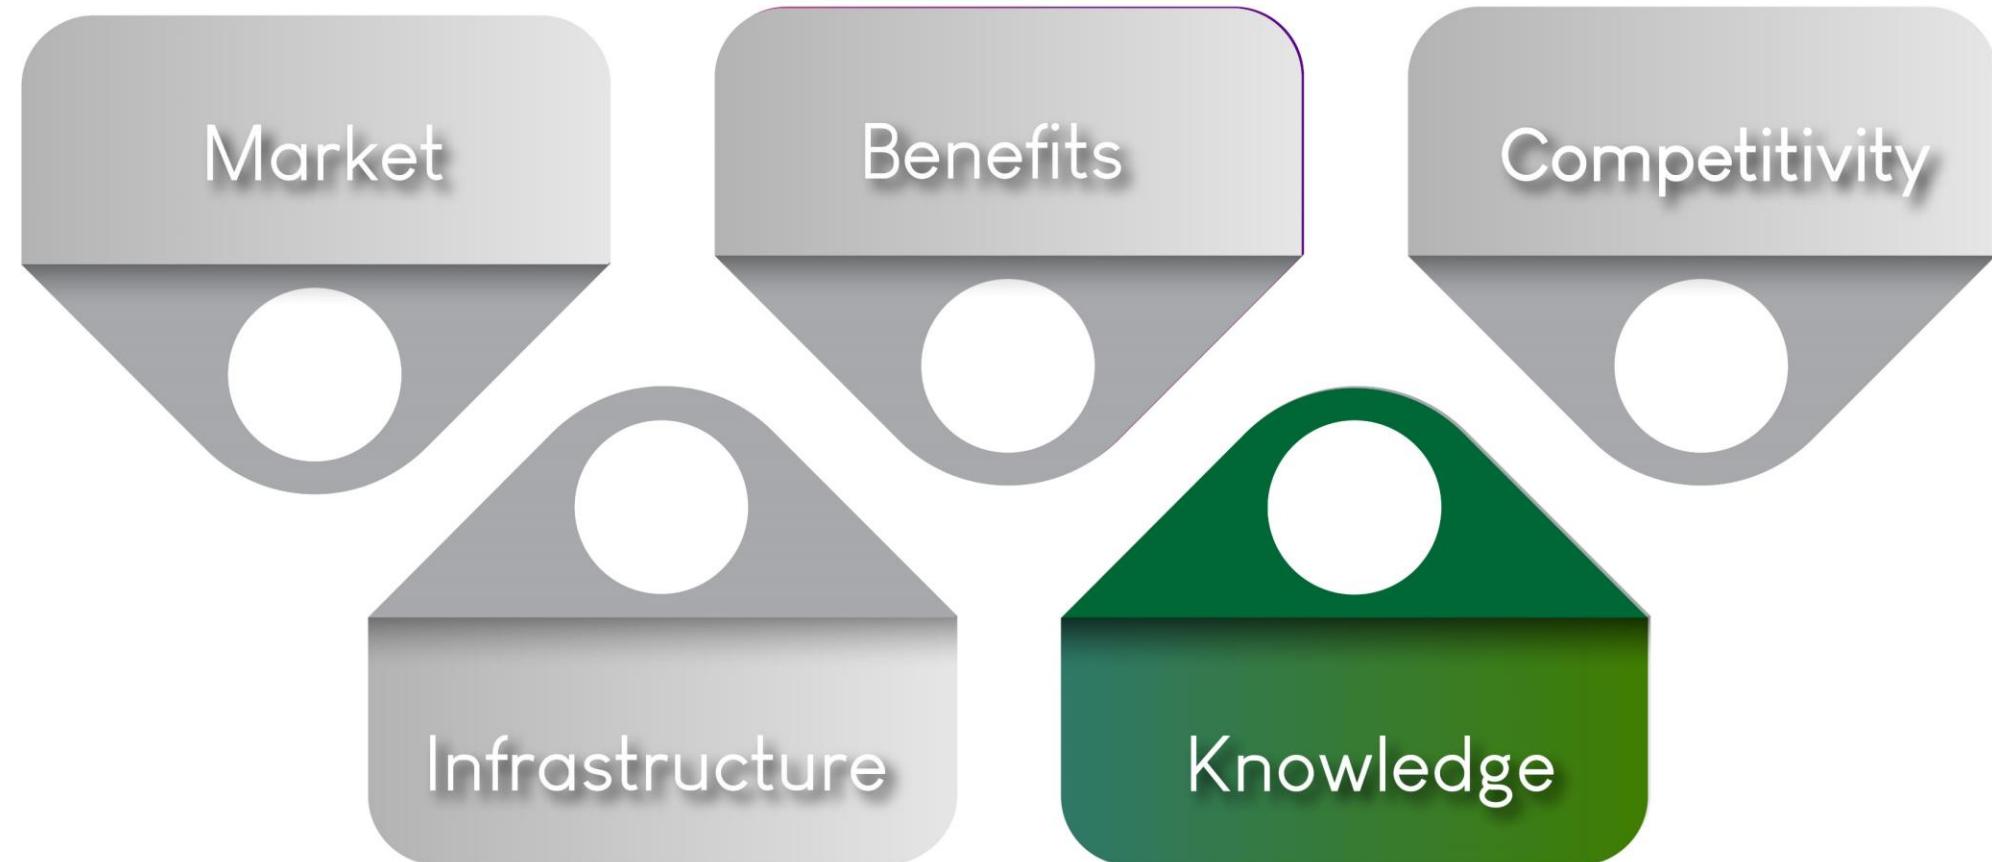

**Company:** Paranoá Indústria de Borracha Ltda

**Project with:** Instituto Senai de Tecnologia e Senai Armando de Arruda Pereira, São Caetano do Sul - Boa Vista

Process 4.0 combining industrial connectivity and AI for the efficient production of thermo/acoustic coating in TPO for light commercial vehicles

# WHY TO INVEST IN RD&I IN BRAZIL'S AUTOMOTIVE VALUE CHAIN

- 2,608 college education institutes in Brazil, including:  
2,076 College,  
294 university centers,  
198 universities  
40 Federal Institutes of Education and Federal Centers for Technological Education.
- 8 Universities among the 25 best in Latin America
- More than 1.8 million engineers graduated in the last 9 years.

## Lochpe-Maxion terá roda de liga leve flexível

Inovação foi revelada pela empresa durante comemoração de 100 anos

Por SERGIO QUINTANILHA, PARA AB  
14/08/2018 - 15:42 | Atualizado há 7 meses, 2 semanas

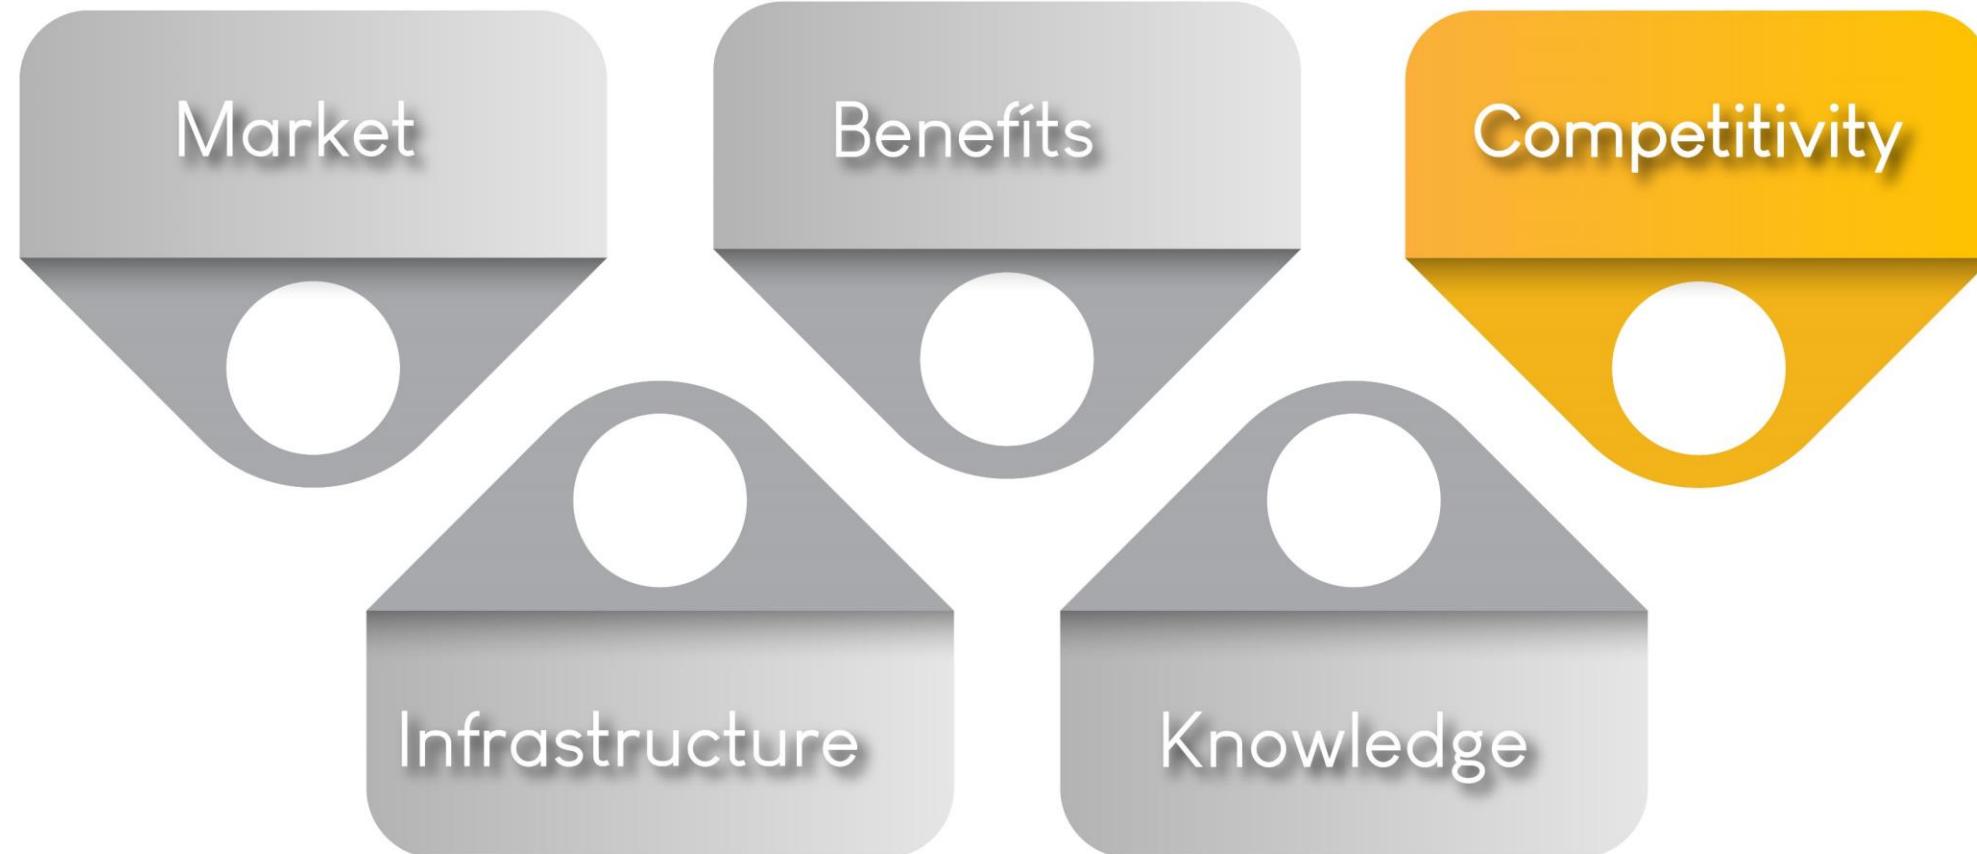

## WEG desenvolve sistema de tração para o primeiro ônibus elétrico híbrido "Dual" do Brasil

O DualBus pode funcionar em múltiplos modos: Elétrico Puro, Híbrido-série e Trólebus

## Sabó: nanotecnologia para fusão na junta de borracha com alumínio

# WHY INVEST IN RD&I IN BRAZIL'S AUTOMOTIVE VALUE CHAIN

# COMPETITIVITY

## Brazil Advantages

Bioelectricity: our electric matrix is 83% renewable and the energy matrix 45% renewable in 2019 (epc).

Reduction and capture of greenhouse gases - GHG

Program Future Fuel

RenovaBio program with incentives for the use and generation of Biofuels and generation of C-Bios (Carbon Market).

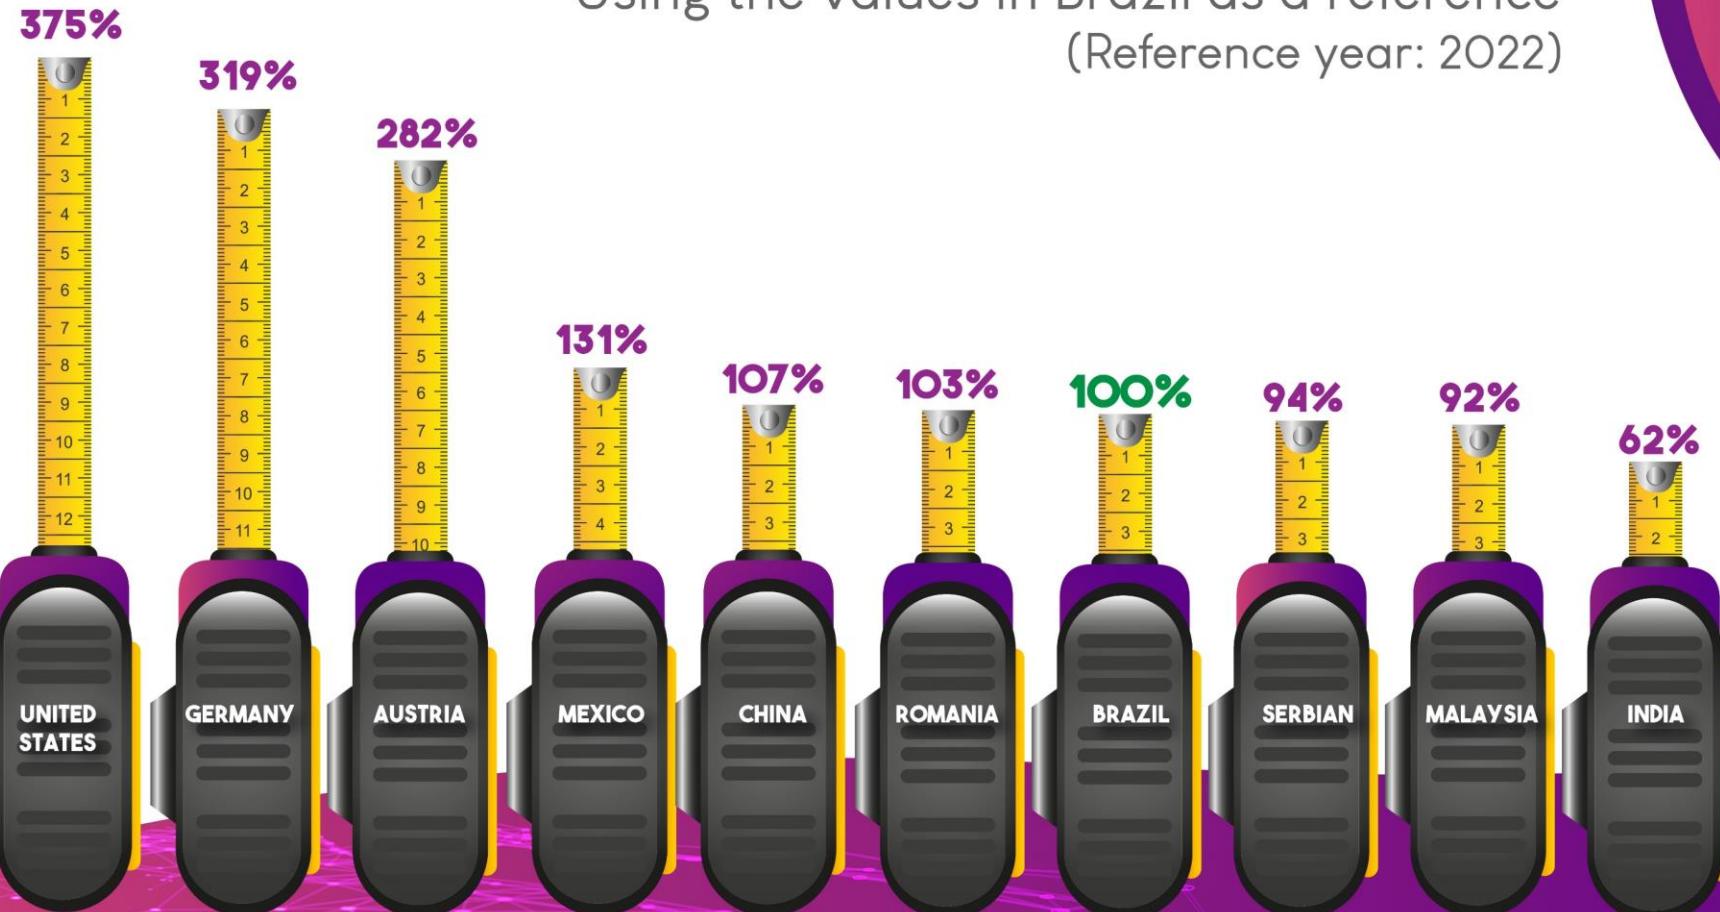

Circular Economy (Remanufacturing, Reuse and Repair), return structure of components, packaging and recyclable items.

Use of Biomass for energy generation.

# COST OF THE ENGINEERING PROFESSIONAL PROFESSIONAL IN THE INDUSTRY

Using the values in Brazil as a reference  
(Reference year: 2022)

The cost of an engineer in Brazil is competitive to similar middle-income countries and lower than the most developed ones

SINDIPEÇAS ABIPEÇAS
